CONTENTS

Volume 31, Issues 1–6

International Journal of
MATHEMATICAL EDUCATION in SCIENCE and TECHNOLOGY

Issue No. 1, JANUARY

Special Issue for the ICMI Study on the Teaching and Learning of Mathematics at University Level
Edited by Derek Holton

Foreword 1

Factors influencing first-year students' success in mathematics G. ANTHONY 3

MATLAB in first-year engineering mathematics L. COLGAN 15

On a research programme concerning the teaching and learning of linear algebra in the first-year of a French science university J.-L. DORIER, A. ROBERT, J. ROBINET and M. ROGALSKI 27

Perceptions of the tertiary learning environment: is mathematics worth the effort? H. J. FORGASZ and G. C. LEDER 37

The history of mathematics as a coupling link between secondary and university teaching F. FURINGHETTI 43

The student experience of mathematical proof at university level K. JONES 53

The visibility of models: using technology as a bridge between mathematics and engineering P. KENT and R. NOSS 61

Redesigning the calculus sequence at a research university: issues, implementation, and objectives H. B. KEYNES and A. M. OLSON ... 71

Mathematical reasoning and familiar procedures J. LITHNER 83

Asking mathematical questions mathematically J. MASON 97

A reform in undergraudate mathematics curriculum: more emphasis on social and pedagogical skills M. E. PESONEN and T. MALVELA 113

Assessment of learning in university mathematics G. SMITH and L. WOOD 125

Policy issues in the teaching and learning of the mathematical sciences at university level J. THOMAS 133

A metacognitive intervention in mathematics at university level R. ZAN 143

Classroom Note

A Capstone Course for pre-service secondary mathematics teachers M. M. SHOAF 151

Issue No. 2, March

Locating starting points in differential equations: a realistic mathematics education approach C. L. Rasmussen and K. D. King 161

Generalized nets in neurology: an example of mathematical modelling S. K. Kim, K. T. Atanassov and A. G. Shannon 173

Strategies and computer projects for teaching linear algebra M. Pecuch Herrero 181

The influence of overcoming fixation in mathematics towards divergent thinking in open-ended mathematics problems on Japanese junior high school students T. Imai 187

Improved knowledge of mathematics and enrolment in a principles of economics course: is there a link? E. Cohn, S. Cohn, R. E. Hult Jr, J. Bradley Jr and D. C. Balch 195

Performance in identifying surface plots of a function of two variables and its first-order partial derivatives J. Carter 205

A Taylor polynomial approach for solving high-order linear Fredholm integro-differential equation Ş. Nas, S. Yalçınbaş and M. Sezer ... 213

Predicting the mathematical preparedness of first-year undergraduates for teaching and learning purposes W. Cox 227

Deterministic modelling in the theory of contagious disease J. Caldwell and T. H. Yan 249

Study of the 'teaching system' according to systems theory D. Gavalas 261

Classroom Notes

A note on error term of Simpson's $\frac{1}{3}^{rd}$ rule R. N. Das and G. Pradhan 269

An invariance property of regular polygons for a problem in probability P. Glaister 271

On a discontinuity of a derivative J. Klippert... 282

Generating covariance matrices A. S. S. Dorvlo 287

A unified elementary approach to some classical inequalities H. Chen 289

Some applications of barycentric computations T. Dana-Picard 293

A heuristic formula for $\frac{d}{dx}[f(x)^{g(x)}]$ D. W. Wu 310

Analytic solutions of first-order nonlinear differential equations L. Roman-Miller and G. H. Smith 312

Issue No. 3, May

New protocols for solving geometric calculation problems incorporating dynamic geometry and computer algebra software H. Schumann and D. Green 319

Number theoretical aspects of primitive Egyptian labellings of the triangle U. Spengler and G. Walther 341

Modelling tumour growth dynamics as a means of determining fractionation protocols in radiotherapy P. D. Dale, K. A. Landman, G. J. Pettet and D. L. S. McElwain 355

Correcting grade deflation caused by multiple-choice scoring A. Baranchik and B. Cherkas 371

Some issues surrounding the use of algebraic calculators in traditional examinations J. Monaghan 381

Structuring mathematical knowledge and skills by means of knowledge graphs B. Zwaneveld 393

Convergence for Fourier series solutions of the forced harmonic oscillator T. H. Fay 415

A constructive proof by elementary transformations of Roth's removal theorems in the theory of matrix equations A. J. B. Ward and F. Gerrish 425

A guide to the establishment of a successful mathematics learning support centre A. C. Croft 431

Classroom Notes

The mean value theorems of Lagrange and Cauchy (II) J. Tong ... 447

An elementary proof of Rayleigh's principle K. M. Andersen 449

An algebraic fraction—derivatives and zeros P. Glaister 453

A Fibonacci generalization and its dual M. de Villiers 464

The duality theorem of linear programming: an intuitive approach C. Zaverdinos 473

A generalization of Fermat's little theorem R. T. Harger and R. M. Smith 476

Issue No. 4, July

Using computer software in the teaching of mechanics T. Graham and S. Rowlands 479

Pedagogical challenges in making mathematics relevant for Indigenous Australians R. Nichol and J. Robinson 495

An alternative model of a nonlinear business cycle R. F. Melka, C. Pierotti and S. N. Gajanan 505

Economic dynamics with computer algebra systems S. L. Ares and I. S. Alvarez 515

B-transform methods and its application in obtaining solutions of some impulsive models B. O. Oyelami and S. O. Ale 525

Impulsive systems and their applications S. O. Ale and B. O. Oyelami 539

The use of relative residues in fitting experimental data: an example from fluid mechanics J. M. Ferreira, L. Caramelo and R. P. Chhabra 545

Introducing technology in algebra in Hong Kong: addressing issues in learning I. A. C. Mok, D. C. Johnson, J. Y. H. Cheung and A. M. S. Lee 553

The uses of homogeneous barycentric coordinates in plane Euclidean geometry P. Yiu 569

Understanding the concepts of proportion and ratio among grade nine students in Malaysia P. Singh 579

Classroom Notes

Generalized elliptic integrals with an application P. Glaister 601

'Proof reading' and multiple choice tests M. Berezina and A. Berman 613

On the equivalence of the Heine–Borel and the Bolzano–Weierstrass theorems L. A. Khan and A. B. Thaheem 620

On divisibility by 7 and other low valued primes T. Eisenberg 622

Elaboration in technical areas D. J. Hartel and A. C. Buxkemper ... 626

Coaxial circles and complex intersections J. N. Boyd and P. N. Raychowdhury 632

Issue No. 5, September

Simulating and visualizing neural networks with *Mathematica* P. A. Watters 639

Conceptual mis(understandings) of beginning undergraduates P. Galbraith and C. Haines 651

An investigation of how perceptions of mathematics ability can affect elementary statistics performance D. Galagedera, G. Woodward and S. Degamboda 679

α-convex convergent alternating series Hamsapriye 691

Representations in applying functions A. van Streun 703

Setting up second-order variable coefficient differential equation problems with known general solution M. A. M. Lynch and H. Gao 727

Beats and periodicity for the forced harmonic oscillator T. H. Fay ... 733

Classroom Notes

Projectile motion with *Mathematica* T. de Alwis 749

An alternative proof for the derivation of the joint distribution of a set of linear functions of correlated normal random variables R. Radhakrishnan and D. R. Robinson 756

Rays of light trapped by conics T. Dana-Picard 758

On a refinement of Hilbert's inequality Y. Bicheng and L. Debnath 773

Limits, continuity, and bow ties: rigour without ε or δ M. Lynch ... 779

Explicit formulations versus recursive formulations—studies based on the Fibonacci sequence and the factorial function Y. K. Huen 788

An interesting result on Pythagorean triplets M. N. Deshpande 796

Erratum 798

Issue No. 6, November

Applications of symmetry to problem solving R. Leikin, A. Berman and O. Zaslavsky 799

About one—an inquiry about the meanings and uses of the number one L. Pogliani, M. Randić and N. Trinajstić 811

The Gibbs' phenomenon and harmonic oscillators with periodic forcing T. H. Fay 825

Understanding and representing the arithmetic averaging algorithm: an analysis and comparison of US and Chinese students' responses J. Cai 839

Software to support numerical analysis teaching M. C. Bartholomew-Biggs 857

A survey of mathematics undergraduates' interaction with proof: some implications for mathematics education D. Almeida 869

Instantaneous rate of change: a numerical approach G. S. Hauger ... 891

A questionnaire to elicit the mathematical concept images of engineering students W. Maull and J. Berry 899

Classroom Notes

Arzela–Ascoli theorem is stable S. H. Kulkarni 919

Convergence of Newton's and Halley's methods in the complex plane Q. Yao 922

Cardano's waves E. B. Gurevich 926

Sources of straight electrostatic flux lines in R^3 J. C. Martinez 929

The role of the implicit function in the Lagrange multiplier rule – E. Bendito, A. Carmona and A. M. Encinas 935

Optimum velocity for a person moving under rain M. Pakdemirli ... 939

A comparative relation between the Gamma function and the exponential S. A. Messaoudi 946

Author Index 949
